

I was born in Indiana and have lived here my entire life. The past few years have been much more peaceful not having the constant, and very frustrating, telemarketer calls. As a result, we didn't answer our phone at all and missed calls from people we actually wanted to hear from. Our answering machine was filled up by calls we did not, and still do not, want.

Please do not all our banks to help you to decide to overturn 02-278 and allow these telemarketers to invade our privacy once more.

I will be contacting our bank to let them know that they could lose my business if they continue to support this backdoor attempt to overturn the bill. I've banked with them since I was eighteen in 1977.

Thank you for your help.
